ISA RECEIVES INVESTMENT-GRADE RATING

- *For the first time, ISA achieved this international qualification*
- *The assignment is a pledge of security for investors*

An important step in the financial market was reached by ISA by obtaining from Fitch Rating the BBB- investment grade rating for local and foreign currency with stable outlook.

According to Fitch Ratings' reports, ISA's rating reflects the strong financial profile of the Company, featured by stable and predictable regulated revenues, acceptable liquidity ratios and adequate credit metrics. The rating is based on the low business risk profile, a characteristic of power transmission businesses, which reflects the natural monopoly position and geographical diversification. In addition, the analyses evaluated the incursion of ISA in the business of road concessions.

The international credit rating obtained by ISA responds to a strategy for preparing the Company to access international financial markets under the best possible conditions, though not necessarily involves the existence of immediate plans to do so.

ISA advances from point-to-point, seeking business opportunities and profitable growth, while generating shareholder value
